1. Introduction

Quizly is an online assessment platform designed for businesses and organisations that need to create, administer, and evaluate tests. Whether you're screening job applicants, certifying employees, or running academic exams, Quizly handles the full process — from building your question set to collecting and scoring results.

This manual walks you through every feature of the platform, step by step. No prior technical knowledge is needed.

---

2. Getting Started

2.1 Creating Your Account

1. Visit the Quizly website and click **Register**.
2. Fill in your first name, last name, email address, and a password.
   - Your password must be at least 8 characters and include an uppercase letter, a lowercase letter, a number, and a special character.
3. Optionally, enter your company name and phone number.
4. Click **Create Account**.

After registration, a 6-digit verification code will be sent to your email address.

2.2 Verifying Your Email

1. Check your inbox for an email from Quizly containing a 6-digit code.
2. Enter the code on the verification screen.
3. If the code has expired (codes are valid for 10 minutes), click **Resend Code** to receive a new one.

Once your email is verified, your account is fully active.

2.3 Signing In

1. Go to the login page and enter your email and password.
2. Click **Sign In**.

If you enter the wrong password too many times in a short period, you'll be temporarily locked out. Wait for the displayed time to pass, then try again.

2.4 Resetting Your Password

1. On the login page, click **Forgot Password**.
2. Enter the email address associated with your account.
3. Check your inbox for a password reset link.
4. Click the link, then enter and confirm your new password.

The reset link can only be used once. After resetting, you'll need to sign in again with your new password.

---

3. Dashboard Overview

After signing in, you'll land on your dashboard. This is your command centre for everything happening across your assessments.

3.1 Summary Cards

At the top of the dashboard, you'll see four summary cards:

- **Total Assessments** — How many assessments you've created.
- **Total Candidates** — The number of unique individuals invited across all your assessments.
- **Completion Rate** — The percentage of invited candidates who have finished their tests.
- **Average Score** — The overall average score across all completed tests.

Each card also shows the change compared to the previous period, so you can spot trends.

3.2 Activity Feed

Below the summary cards is a live activity feed showing recent events, such as:

- A candidate completing a test (with their score).
- A new candidate being added to an assessment.

This feed updates automatically — you don't need to refresh the page.

---

4. Working with Assessments

4.1 Creating a New Assessment

1. Navigate to **Assessments** from the sidebar.
2. Click **Create Assessment**.
3. Fill in the following:
    - **Title** — A clear name for the assessment (e.g., "Q2 Safety Certification").
    - **Description** — A brief explanation shown to candidates before they begin.
    - **Duration** — The time limit in minutes. Candidates see a countdown timer during the test. The minimum is 5 minutes, the maximum is 480 minutes (8 hours).
    - **Pass Percentage** — The score a candidate needs to pass (e.g., 70%).
    - **Start Date & Time** — When the assessment becomes available.
    - **End Date & Time** — When the assessment closes.

4. Configure optional settings:
    - **Shuffle Questions** — Randomise the order of questions for each candidate.
    - **Shuffle Options** — Randomise the order of answer choices within each question.
    - **Allow Back Navigation** — Let candidates go back to previous questions.
    - **Show Results to Candidate** — Let candidates see their score immediately after submission.
5. If desired, enable proctoring options:
    - **Proctoring Enabled** — Activates monitoring features.
    - **Fullscreen Required** — Forces the test into fullscreen mode.
    - **Auto-End on Tab Switch** — Immediately ends the test if a candidate switches to another tab or window.
    - **Webcam Required** — Records the candidate's webcam feed during the test.
6. Click **Save**.

Your assessment is now in **Draft** status. You can add questions and candidates before publishing.

4.2 Using Assessment Templates

Instead of building an assessment from scratch, you can start from one of the 14 built-in templates. These cover a wide range of industries including petroleum safety, software engineering, healthcare, cybersecurity, data science, and more.

To clone a full template:

1. Go to **Assessments** and click **Templates** (or look for a "Browse Templates" option).
2. Browse the available templates. Each one shows a title, description, number of questions, and question types used.
3. Click **Use Template** (or similar) on the one you want.
4. A new draft assessment will be created with all the template's questions pre-loaded. You can then edit, add, or remove questions as needed.

To import selected questions from a template:

1. Open an existing assessment and go to the questions section.
2. Look for an option to import from templates.
3. Select a template and browse its questions.
4. Pick the specific questions you want and add them to your assessment.

4.3 Duplicating an Assessment

If you want to reuse a previous assessment:

1. Go to your assessment list.
2. Find the assessment you want to copy and click **Duplicate**.
3. A new draft is created with the same questions and options. The title will have "(Copy)" appended.
4. Edit the duplicate as needed — it is completely independent from the original.

4.4 Editing an Assessment

- **Draft assessments** can be fully edited — title, description, settings, and all configuration options.
- **Published assessments** can only have their scheduling fields changed (start date, end date, duration, and whether to show results to candidates). This restriction protects the integrity of tests that are already in progress.

4.5 Deleting an Assessment

Assessments can only be deleted if they are in **Draft** or **Cancelled** status. Active or completed assessments cannot be deleted.

---

5. Managing Questions

5.1 Adding Questions

1. Open your assessment and navigate to the questions section.
2. Click **Add Question**.
3. Select the question type. The available types are:

   Standard:

   - **Single Choice** — Present multiple options, only one is correct.
   - **Multiple Choice** — Present multiple options, one or more can be correct.
   - **True/False** — A statement that is either true or false.
   - **Fill in the Blank** — The candidate types a short answer. You define the accepted answers (multiple correct spellings or phrasings can be listed, separated by `||`).
   - **Numeric** — The candidate enters a number. You set the correct answer and can allow a tolerance range.
   - **Text Input** — An open-ended free text response.

Advanced:

- **Ordering** — The candidate arranges items in the correct sequence.
- **Matching** — The candidate pairs items from two columns.
- **Code Snippet** — The candidate writes a block of code.

Reasoning & Psychometric:

- **Sequence Pattern** — Find the next item in a series.
- **Matrix Pattern** — Identify the missing piece in a 3×3 grid.
- **Odd One Out** — Identify which item doesn't belong.
- **Analogy** — Complete an A is to B as C is to ___relationship.
- **Mental Maths** — Solve a mental arithmetic problem.
- **Word Problem** — Solve an applied maths or logic problem.
- **Spatial Rotation** — Identify a rotated or transformed shape.
- **Pattern Recognition** — Spot the rule in a visual pattern.

Interactive:

- **Shape Puzzle** — Drag shapes into the correct slots.
- **Drag & Drop Sort** — Drag items into correct positions.
- **Hotspot** — Click on a specific area of an image.
- **Likert Scale** — Rate agreement on a scale.

4. Enter the question text.
5. Set the point value for the question (how many marks it's worth).
6. For choice-based questions, add the answer options and mark which ones are correct.
7. For fill-in-the-blank and numeric questions, enter the expected answer.
8. Click **Save**.

5.2 Importing Questions via CSV

For bulk question entry:

1. Prepare a CSV file with your questions. The file should follow the format expected by the platform.
2. In your assessment's question section, click **Import CSV**.
3. Upload the file. The system will parse the rows, skip any invalid entries, and report how many questions were imported.

5.3 Reordering Questions

Drag questions to rearrange them into your preferred order. This order determines the sequence candidates see during the test (unless question shuffling is enabled).

5.4 Batch Deleting Questions

1. Select multiple questions using the checkboxes.
2. Click **Delete Selected**.
3. Confirm the deletion.

---

6. Managing Candidates

6.1 Adding Candidates

There are three ways to add candidates to an assessment:

Option A — Add individually:

1. In the assessment's candidates section, click **Add Candidate**.
2. Enter the candidate's email address (required), first name, and last name (optional).
3. Click **Add**.

Option B — Add in bulk:

1. Click **Add Multiple** (or similar).
2. Paste a list of email addresses (one per line or comma-separated).
3. Click **Add All**.

Option C — Upload a CSV:

1. Click **Upload CSV**.
2. Upload a CSV file. The system accepts files with the following column structures:
   - Email only
   - Email, First Name
   - Email, First Name, Last Name
3. The system auto-detects headers and skips any invalid email addresses.
4. Duplicates (emails already added to this assessment) are automatically skipped.

Up to 1,000 candidates can be added in a single batch.

6.2 Re-Inviting Previous Candidates

If you've used Quizly for previous assessments, you can pull in candidates from those without re-entering their details:

1. In the candidates section, look for **Previous Candidates**.
2. Browse candidates from your other assessments.
3. Select the ones you want to add and confirm.

6.3 Editing a Candidate

You can change a candidate's email or name as long as they haven't started the test yet. Once a candidate has started, their details are locked to preserve data integrity.

6.4 Removing Candidates

Candidates can only be removed if they haven't started the test. Candidates who have already started or completed cannot be removed.

6.5 Sending and Resending Invitations

- **Auto-Send on Publish:** When you publish an assessment, invitation emails are automatically queued for all candidates.
- **Manual Send:** You can manually send or resend invitations at any time from the candidates section.
- **Batch Resend:** Select multiple candidates and resend invitations to all of them at once.

Emails are sent in batches of 50 with short delays between batches to ensure reliable delivery.

---

7. Publishing & Sharing an Assessment

7.1 Publishing

Before an assessment can be published, it must have:

- At least one question.
- At least one candidate.

To publish:

1. Open the assessment.
2. Click **Publish**.
3. The system will:
    - Change the status to **Active** (if the start date is now or in the past) or **Scheduled** (if the start date is in the future).
    - Generate a public access code.
    - Queue invitation emails for all candidates.

7.2 Public Access Link

After publishing, a shareable link is generated using the assessment's access code. You can share this link on social media, messaging apps, or your company intranet.

When someone opens this link:

1. They see the assessment title, description, and time details.
2. They enter their name and email address.
3. The system creates an invitation for them and redirects them to start the test.

This is useful when you don't have a fixed candidate list in advance — for example, for open recruitment drives.

If someone tries to join with an email that's already registered for this assessment, the system handles it gracefully (either resuming their existing session or telling them they've already completed the test).

---

8. Monitoring Results & Analytics

8.1 Assessment Results

To view results for a specific assessment:

1. Open the assessment.
2. Go to the **Results** tab.
3. You'll see a ranked list of all candidates who have submitted, showing:
    - Name and email
    - Total score and percentage
    - Pass/fail status
    - Time spent
    - Proctoring flags (how many tab switches and fullscreen exits)

8.2 Individual Candidate Review

Click on any candidate in the results list to see their full session detail:

- **Score Breakdown** — Score achieved vs. maximum possible.
- **Answer-by-Answer Review** — Each question with the candidate's answer, the correct answer, and whether they got it right.
- **Proctoring Summary** — Number of tab switches, fullscreen exits, IP address, and device information.
- **Webcam Recording** — If webcam recording was enabled, play back the candidate's session video.

8.3 Assessment Analytics

The analytics view for each assessment provides:

- **Summary Statistics** — Total invites, total takers, response rate, pass count, fail count, pass rate, average score, and average completion time.
- **Pass/Fail Chart** — A visual breakdown of pass vs. fail.
- **Score Distribution** — A histogram showing how many candidates scored in each range (0–20%, 21–40%, 41–60%, 61–80%, 81–100%).
- **Question Analysis** — A table showing each question, how many candidates attempted it, how many got it right, and its success rate. This helps you identify questions that are too easy or too hard.

8.4 Platform-Wide Analytics

From the **Analytics** section in your main navigation, you can see trends across all your assessments:

- Total tests completed
- Average score and pass rate (overall)
- Average completion time
- Score distribution (aggregated)
- Tests over time (last 7 days)
- Completion funnel (invited → started → completed → passed)
- Time distribution (how long candidates typically take)
- 30-day trend (daily tests and average scores)
- Top scorers across all assessments
- Question difficulty analysis (which questions have the lowest success rate)

---

9. Test-Taking Guide (For Candidates)

This section is for the person taking the test.

9.1 Opening Your Invitation

You'll receive an email with a link to your assessment. Click the link to go to the test page.

On the welcome screen, you'll see:

- The assessment title and description.
- The time limit.
- Any special requirements (webcam, fullscreen).

9.2 Starting the Test

1. Confirm or enter your name.
2. If the assessment requires webcam access, your browser will ask for camera permissions — click **Allow**.
3. If fullscreen mode is required, the page will switch to fullscreen automatically. Do not exit fullscreen during the test.
4. Click **Start Test**.

The timer begins as soon as you start.

9.3 Answering Questions

- Questions appear one at a time.
- The question type determines how you respond:
  - For multiple choice, click on your answer.
  - For fill-in-the-blank, type your answer in the text field.
  - For ordering questions, drag items into the correct sequence.
  - For shape puzzles, drag shapes into the matching slots.
- Your answer is saved automatically each time you respond. You don't need to click a separate "save" button per question.
- If back navigation is enabled, you can return to previous questions and change your answers. If it's disabled, you can only move forward.
- A navigation panel (if enabled) shows you which questions you've answered and lets you jump to any question.

9.4 The Timer

A countdown timer is always visible at the top of the screen. When the timer reaches zero, your test is automatically submitted with whatever answers you've provided. There is no grace period.

9.5 Resuming a Test

If you lose your internet connection, close your browser, or your device shuts down during the test:

1. Open the same link from your invitation email.
2. The system will detect your existing session.
3. You'll be resumed from where you left off, with the timer continuing from where it paused.

Keep in mind that the timer has been running since you started, so you'll have less time remaining.

9.6 Submitting the Test

When you've answered all the questions (or as many as you want):

1. Click **Submit Test**.
2. You'll be asked to confirm.
3. After confirmation, your answers are scored.
4. If the assessment creator has allowed it, you'll see your results — total score, percentage, and pass/fail status.
5. If result display is disabled, you'll see a confirmation that your test has been submitted.

9.7 Proctoring Notices

If your test has proctoring enabled:

- **Stay in fullscreen.** Exiting fullscreen is recorded and visible to the person who created the test.
- **Don't switch tabs.** Tab switches are detected and counted. Some tests are set to auto-end if you switch away.
- **Keep your webcam on.** If webcam recording is required, your video is saved and linked to your test session.

These measures exist to ensure fair testing conditions for all candidates.

9.8 Taking a Test via a Public Link

If you received a shared link (rather than a personal invitation):

1. Open the link.
2. Enter your email, first name, and last name.
3. Click **Join**.
4. You'll be redirected to start the test.

If you've already registered or completed this test, the system will let you know.

---

10. Subscription & Billing

10.1 Choosing a Plan

1. After verifying your email, you'll be prompted to select a subscription plan.
2. Browse the available plans. Each one lists what's included and its price.
3. Click **Select** on your preferred plan.

10.2 Making a Payment

1. After selecting a plan, you'll be directed to a secure checkout page hosted by Flutterwave (our payment processor).
2. Complete the payment using your preferred method (card, bank transfer, etc.).
3. After payment, you'll be redirected back to Quizly.
4. Your subscription is activated immediately, and a confirmation email is sent to your inbox.

10.3 Checking Your Subscription Status

You can view your current subscription status at any time from your account settings or profile. This shows:

- Your current plan name.
- When your subscription expires.
- Your most recent payment details.

10.4 What Happens When Your Subscription Expires

If your subscription expires, you'll still be able to sign in, view your existing assessments and results, and browse templates. However, you won't be able to create new assessments, add questions, or manage candidates until you renew.

11. Super Admin Operations

This section is for internal platform administrators only.

11.1 Accessing the Admin Panel

1. Go to the admin login page (separate from the regular login).
2. Sign in with your admin credentials.
3. You'll land on the admin dashboard.

11.2 Admin Dashboard

The dashboard shows a complete overview of the platform:

- **Users** — Total users, new this month, active accounts, active subscriptions.
- **Assessments** — Total assessments, currently active, created this month.
- **Revenue** — Total lifetime revenue, revenue this month.
- **Trend Charts** — Monthly user registrations, assessment creation, and revenue over the last 6 months.
- **Test Session Summary** — Total invitations, completed tests, in-progress tests, timed-out tests, average score.
- **Plan Distribution** — Breakdown of users by subscription plan (including free/unpaid users).

11.3 User Management

From the **Users** section:

- **Search** by name, email, or company name.
- **Filter** by subscription status (active, expired, none) or account status (active/disabled).
- **View** a user's full profile, including their assessment count and payment history.
- **Edit** a user's name, company, subscription status, or expiry date.
- **Disable/Enable** an account. Disabling a user immediately revokes all their sessions, effectively logging them out everywhere.

11.4 Subscription Plan Management

From the **Subscription Plans** section:

- **Create** a new plan with a name, monthly price, annual discount percentage, and feature list.
- **Edit** an existing plan's name, price, discount, or features.
- **Delete** a plan — but only if no users currently have an active subscription on that plan.

Changes to plans take effect immediately. Cached plan data refreshes within 5 minutes.

11.5 Assessment Management

From the **Assessments** section:

- Browse all assessments across every user on the platform.
- **Search** by title and **filter** by status.
- **View** full assessment details, including questions, candidates, and results.
- **Delete** any assessment.
- **Toggle Template** — Mark any assessment as a system template, making it available in the template library for all users. Toggling it off removes it from the library.

11.6 Template Administration

To create a new template from scratch:

1. Go to **Assessments** in the admin panel and click **Create Template**.
2. Enter a title and description.
3. After creation, add questions to the template using the admin question management interface.

You can edit or delete questions within templates at any time.

11.7 Revenue & Reports

Revenue Page:

- Total lifetime revenue.
- Monthly revenue trend (last 12 months).
- Revenue by billing cycle (monthly vs. annual).
- User distribution (active subscribers, expired, never subscribed).
- Recent payments list with user details.

Reports Page:

- Select a date range.
- View revenue, new users, assessments created, and tests completed for that period.

- Compare against the previous period (percentage change is calculated automatically).
- View revenue trend and user growth charts.
- Browse recent transactions.
- **Export to PDF** — Generate a formatted report for the selected date range.

11.8 Feature Flags

From the **Feature Flags** section:

- View all platform feature flags, organised by category (Payments, Proctoring, Assessments, Communication, Auth, Platform).
- Toggle any flag on or off.
- Changes take effect immediately across the entire platform.

Use feature flags to:

- Temporarily disable payments during maintenance.
- Turn off webcam recording if the cloud storage provider is down.
- Disable new user registration during a controlled launch.
- Put the platform into maintenance mode.

11.9 Platform Settings

From the **Settings** section:

- View and edit platform-wide settings.
- Each setting has a key, a value, and a type (text, number, true/false, or structured data).
- Changes are saved immediately.

---

12. Frequently Asked Questions

Q: Can a candidate take the same assessment more than once? No. Each email address can only be used once per assessment. If a candidate tries to start a second session with an email that has already completed the test, they'll be blocked with a message saying they've already completed it.

Q: What happens if a candidate's internet drops during the test? Their session remains active. When they reopen the link, they can resume from where they left off. The timer keeps running, so they'll have less time remaining.

Q: Can I change questions after publishing an assessment? No. Once an assessment is published, the question set is locked. This ensures all candidates are tested on the same material. You can still change the start/end dates and duration.

Q: How do I know if a candidate cheated? Check the candidate's session detail view. You'll see the number of tab switches, fullscreen exits, and (if enabled) the webcam recording. The fraud detection system also flags suspicious patterns like duplicate device fingerprints or IP addresses.

Q: Can I use Quizly without a subscription? You can register, verify your email, and browse templates. To create and manage assessments, you'll need an active subscription.

Q: What file format does the CSV import accept? Standard CSV files (.csv). The first column should always be the email address. Optional second and third columns can contain the first name and last name. If the first row looks like a header (e.g., "Email", "First Name"), it will be skipped automatically.

Q: How many candidates can I add to a single assessment? Up to 1,000 per batch upload. There is no hard limit on the total number of candidates per assessment — you can add multiple batches.

Q: Can anyone take my assessment, even without an invitation? Only if you share the public access link that's generated after publishing. Candidates who use this link will need to register with their name and email before starting. If you prefer restricted access, only share the individual invitation links sent by email.

Q: How long are assessment results stored? Results and session data are retained for the lifetime of your account. They are not automatically deleted.

---

13. Support

If you need help or have a question that isn't covered in this manual:

- **Contact Form** — Use the Contact page on the Quizly website to send a message to our support team.
- **Email** — Reach out directly via the support email address listed on the Contact page.

When contacting support, it helps to include the assessment title, the candidate's email address (if applicable), and a description of the issue.

End of Document
